ECOFISH RESEARCH

SPATIAL ANALYST/INTERACTIVE WEB DEVELOPER

Office Location: Open

WHO IS ECOFISH LOOKING FOR?

We are looking for a dedicated and hard-working Spatial Analyst / Interactive Web Developer to join our dynamic team! Are you looking for an opportunity to join a team of experienced and skilled professionals who thrive on innovation, collaboration, and integrity? While working alongside Ecofish experts in your field, we will support your career goals by providing great opportunities for growth and advancement through mentorship, training, and other professional development opportunities.

WHY ECOFISH?

The environment needs our help, and we are up to the challenge. At Ecofish, we have made the environment our life's work, as reflected by our mission: Creating and implementing innovative environmental designs and practices to create solutions that assist, and support industry and government deliver green, sustainable developments.

To achieve our mission, our team is the embodiment of our values:

- **Science based:** We characterize, hypothesize, predict and test – to be accurate and assure quality.
- **Ethical:** We consistently meet or surpass environmental laws, regulations, and guidelines to minimize impacts on the environment.
- **Ingenuity:** We develop novel techniques to increase accuracy in assessing environmental impacts and create innovative solutions for our clients.
- **Professional:** We are competent, honest, ethical, reliable, and certified by accredited bodies.

Ecofish incorporates these values in all aspects of our work. Social responsibility is at the core of our mission. Internally and externally, we bring a strong willingness to be cooperative and supportive of our clients, employees, and suppliers.

WONDERING WHAT YOU'LL BE RESPONSIBLE FOR?

Your role will require you to bring a high standard of scientific excellence to your daily work. Your responsibilities will be to:

- Assess and visualize cumulative effects of development and climate change.
- Develop interactive web applications.
- Conduct watershed assessments with spatial data using innovative techniques such as stream network modelling.
- Summarize and analyze data to draw conclusions on environmental conditions.
- Document these results in written reports and present the results to clients, regulators, Indigenous groups, and stakeholders.
- Work as a member of an interdisciplinary team, collaborating with your colleagues to maximize work productivity and quality.

THE QUALIFICATIONS AND SKILLS WE ARE LOOKING FOR.

- A M.Sc. or Ph.D. in geospatial analysis, computer science, statistics, applied biology, geography, or related discipline.
- Experience using R and interactive mapping packages such as Leaflet and Shiny
- Effective analytical and technical writing skills with the ability to produce high quality reports.
- Strong attention to detail and a commitment to quality, and excellence are key attributes.
