

# Ecofish Research Ltd. Enhances Environmental Service Capabilities with ECODynamic Solutions Inc. Transaction

January 26<sup>th</sup>, 2017

**I AM PLEASED TO ANNOUNCE THAT ECODYNAMIC SOLUTIONS INC. (EDS), A LEADING ENVIRONMENTAL CONSTRUCTION MONITORING FIRM LOCATED IN COURTENAY, B.C., HAS JOINED FORCES WITH ECOFISH RESEARCH LTD. EFFECTIVE JANUARY 2017.**

A recognized expert construction environmental management and monitoring firm, EDS has for the past decade provided efficient and timely service to dozens of clients across the hydro, mining, urban, linear development, and government sectors in western Canada. With a staff of recognized experts in the field of construction monitoring, EDS has an excellent reputation among regulatory agencies and clients, including BC Hydro, Brookfield Renewable Power, Altagas and Alterra.

For years Ecofish and EDS have teamed on major development projects, proving our value by solving challenging environmental problems in all project phases. By binding our successful association within a single firm, we have strengthened our expertise and created the conditions to continuously increase service value to our growing client list. With a larger and more diverse team, Ecofish can provide effective, reliable environmental construction monitoring and assessment services across key industries, to private clients, First Nations and regulatory agencies.

With this added capacity, Ecofish can provide an integrated and efficient environmental service at the same high quality and effectiveness you have come to expect from us. Our staff are enthusiastically committed to your projects and helping you better manage your most demanding environmental challenges. We look forward to strengthening our relationship with you.

Please feel free to contact me if you have any questions or would like further information.

Sincerely,

*Adam Lewis*
